

 **DOMUS3D**[®] 2018

IMAGINE | DESIGN | SHARE

DOMUS3D®

the most widely used **Interior Design software** on the market

Speed and **efficiency** to **captivate, excite** and **convince**

DOMUS3D® GIVES YOU THE OPPORTUNITY TO **DESIGN ANY INTERIOR**, CUSTOMIZING WITH **COVERING MATERIALS, FURNISHINGS, AND ACCESSORIES** COMING FROM **MANUFACTURERS' LIBRARIES ALWAYS KEPT UP-TO-DATE.**

Imagine Design Create

DOMUS3D® IS THE
OFFICIAL SOFTWARE
CHOSEN BY MAJOR
MANUFACTURERS OF
FURNITURE, TILES, AND
SANITARY WARE.

aloz

Successful Manufacturers and **Retailers** have been using **DomuS3D®** for many years due to its...

EXPERIENCE

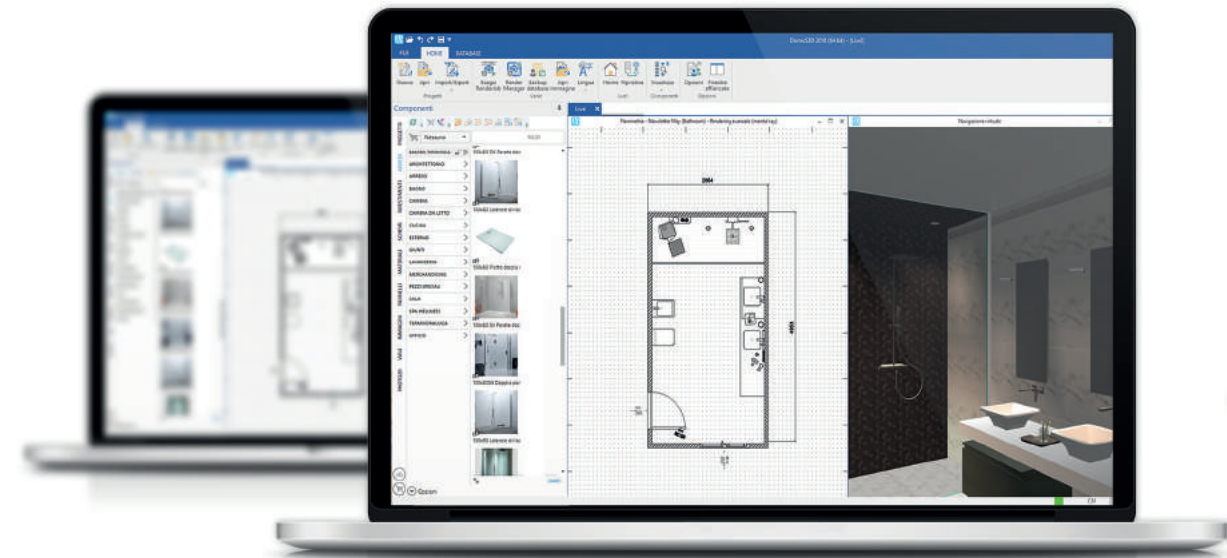

THE LEADING **SOFTWARE** IN **CERAMIC TILES** AND **SANITARY WARE** MARKETS, WIDELY USED BY THE MOST IMPORTANT MANUFACTURERS AND **RETAILERS ALL OVER THE WORLD.**

CATALOGUES LIBRARY, constantly updated

MATICAD **CATALOGUES DEPARTMENT** IS DAILY INVOLVED IN SETTING UP AND KEEPING UP-TO-DATE THE **MOST IMPORTANT CATALOGUES** ... IMPOSSIBLE TO DO WITHOUT!

EASE OF USE and power

AN **INTEGRATED SYSTEM** THAT ALLOWS YOU TO DESIGN CUSTOMIZED SOLUTIONS, PROMOTING MATERIALS SUCH AS **CERAMIC TILE, HARDWOOD, STONE, SANITARY WARE, FURNISHING.**

DOMUS3D[®] 2018

Layout design

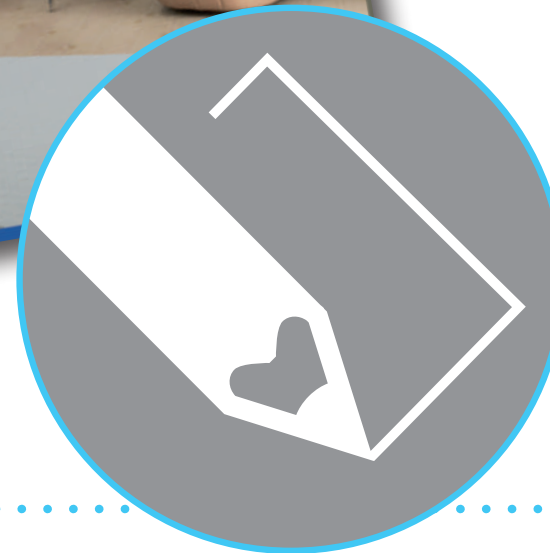

Layout design (single and multi-room) is quick and simple.

2D Cad module helps you manage more complicated shapes: you have all the tools to draw what you need (lines, polylines, arches, splines...).

Import from external files (DWG and DXF formats).

Advanced features for walls: width, niches, holes, sloping ceilings...

Available (and customizable) **room templates** help you create a project with one click.

Modular furnishing elements and accessories

Import new 3D objects from Trimble: 3D Warehouse (SketchUp).

The 3D object library contains thousands of items: you can download them from the Cloud. Our Catalogues Department continuously works to keep them up-to-date.

Domu3D® is OPEN: it is possible to create your own tiles and 3D objects collections and catalogues

Modular furniture: alongside the static 3D object libraries, you can draw detailed modular furniture (e.g. kitchens, bedrooms, bathrooms, ...), thanks to integrated frameworks and applications (optional module).

Dynamic objects: doors and windows, cabinet doors, tile displays, ... can be opened/moved as in the real life.

Aided design: inserting and positioning certain types of elements (e.g. faucets) has been simplified with the use of **magnetic hooking points**.

Related elements: save time when designing with the intelligent management of elements, which suggests compatible or related elements to the one just introduced.

Tile Layout and patterns

Thanks to dedicated features (e.g., vertical laying, frames, shower box corners, inner areas, countertops and steps,...) **you can create any solution you need, no matter if it is a quick fix or a detailed one.**

You can be faster and more efficient by dragging and dropping tiles while in 3D, **keeping concentrated on the architecture and look&feel of the project.**

More **than 300 laying schemes (patterns)** are available with installation and new ones can be downloaded from the Cloud. They will allow you to create multi-format patterns with just a few clicks.

Dynamic grout and pattern alignment allows you to decide where to start tiling (and, as a result, how to cut tiles).

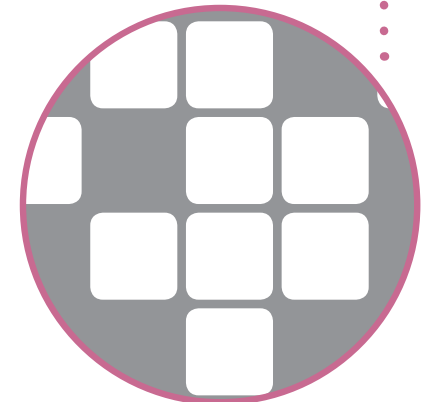

Photo3D: From photo to design

DomuS3D® 2018 integrates Augmented Reality technology

DomuS3D® allows you to take advantage of the Augmented Reality technology thanks to RealityRemod, the revolutionary app that allows you to:

- Get a snapshot of your room
- Select a surface where to change materials
- Easily and quickly apply new covering materials
- Save the project and send it by email to a DomuS3D® designer

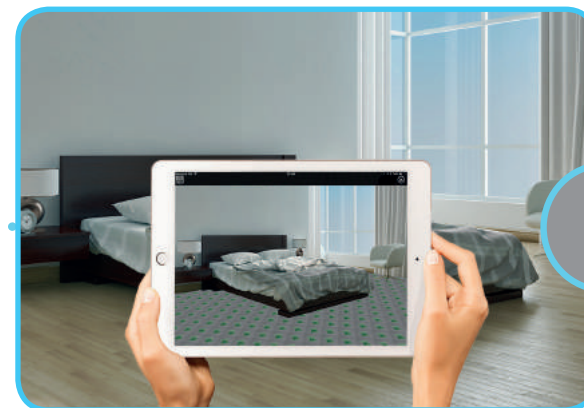

In DomuS3D®, in fact, the designer has a wider choice of laying patterns, materials and tools in order to create new alternative furnishing solutions directly applied on the original snapshot.

Project estimate and blueprints

Anywhere in the project you can create **detailed technical printouts** for floor and walls.

Technical blueprint for the installer module allows you to automatically generate a complete brochure with all the needed information for a detailed installation.

Project estimate can be formatted and printed using several (customizable) templates; furthermore, with covering materials, you can specify a waste factor.

Summary brochure: when project is complete, you can automatically print a document containing all relevant information about it. You can save it in .docx format, so that you can open and modify it whenever you please, with Microsoft™ Word.

Attachments: with the project, you can save any document related to the customer (email, PDF, images, Excel spreadsheets, etc...).

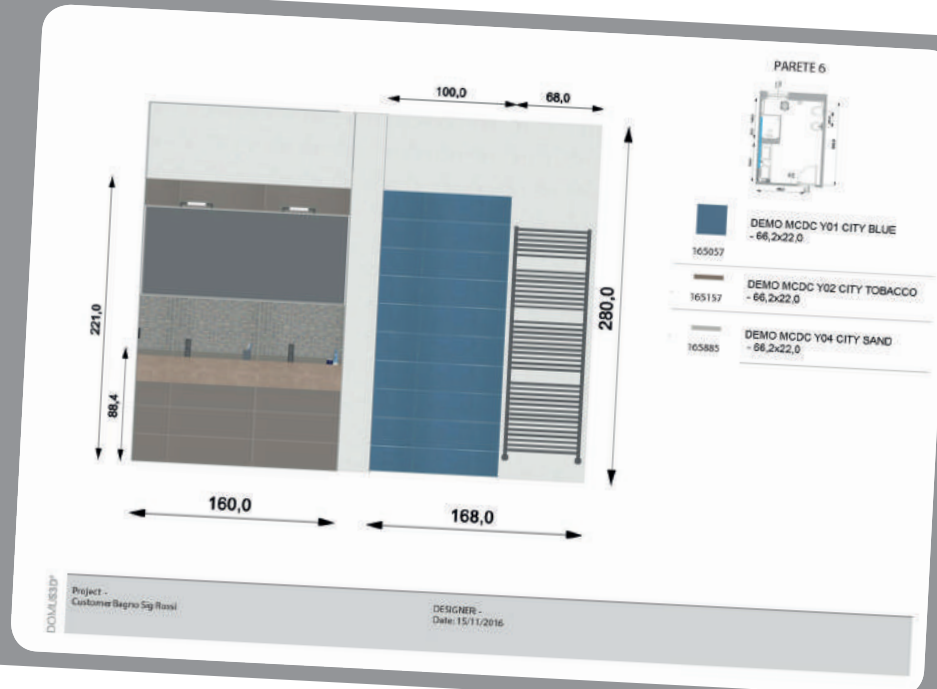

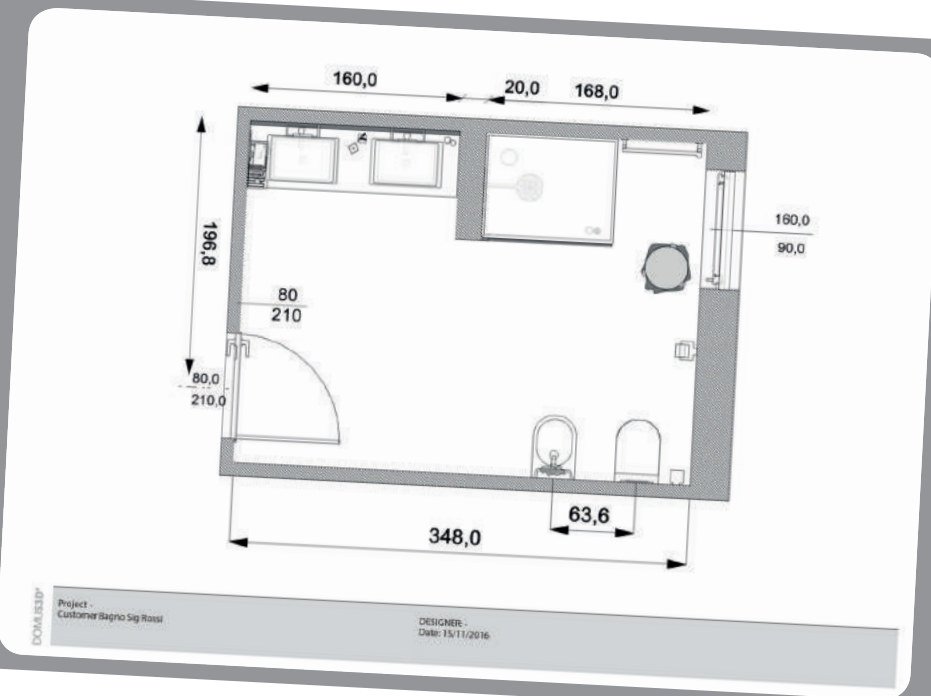

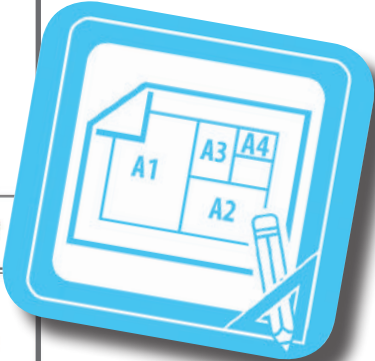

Image	Material Code	Material Name	Quantity	Unit Price	Total Price	Tax
	TOTALE					
	DEMO MCDC Y01 CITY BLUE		1,00	1,00	1,00	0,00
	DEMO MCDC Y02 CITY TOBACCO		1,00	1,00	1,00	0,00

Professional rendering and Virtual Reality

The best result, when considering project images, can be achieved through the rendering of the scene

The final effect is powerful and of the utmost authenticity.

DomuS3D® gives you the power of the world leading rendering engine (**V-Ray®**), made easy for daily use thanks to sophisticated interfaces, so that anyone can attain stunning images.

Rendering production type:

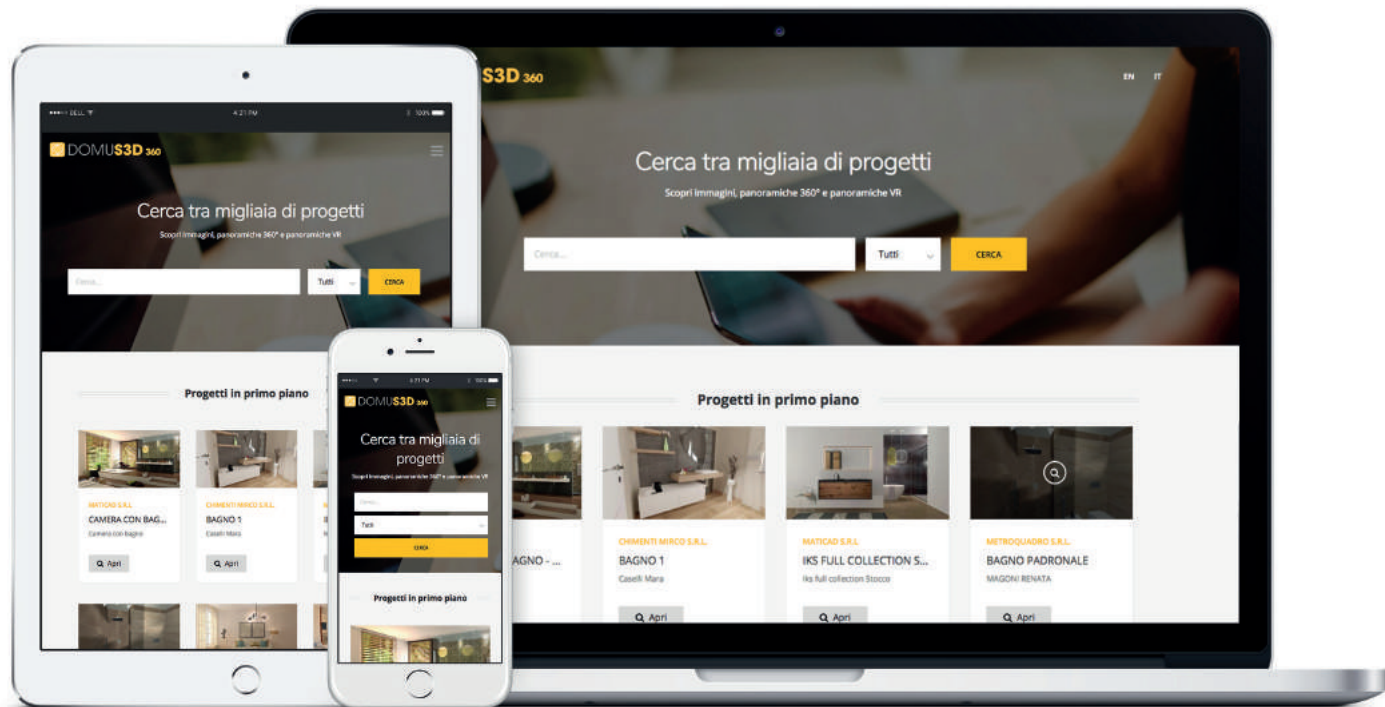

- Photorealistic images
- 3D stereoscopic images
- 360° Panoramas
- VR Panoramas (Virtual Reality)

Share projects on your "mobile"

DOMUS3D 360

An App with which to share your projects through DomuS3D® Cloud.

View and navigate projects on your tablet, smartphone or PC.

With DomuS3D® 360° you can share:

- 1. Navigable projects created with DomuS3D®
- 2. Photorealistic images
- 3. Project Brochure
- 4. Technical printouts
- 5. Immagini panoramiche 360°
- 6. 360° Panoramas for Virtual Reality

Projects available anytime, anywhere

AVAILABLE FOR

DECORATION

On-line library with thousands of 3D objects ready for use.

MATERIALS

All the materials you need in order to achieve unique results.

TILES

A database with more than one million tiles from hundreds of manufacturers

SANITARY WARE

Wide selection of items available from catalogs of major manufacturers.

DomuS3D® Knowledge Base

THE NEW KNOWLEDGE BASE WEB STRUCTURE REPRESENTS **THE TECHNICAL REFERENCE CENTER** FOR DOMUS3D® 2018 USERS, AN ONLINE GUIDE THAT ALLOWS YOU TO IMPROVE THE EFFICIENCY OF YOUR JOB.

IT INCLUDES MANUALS, TIPS&TRICKS, A SEARCH ENGINE THAT CAN PROVIDE IMMEDIATELY ANSWERS TO YOUR DOUBTS AND QUESTIONS.
